

Windows

Rewindo GmbH, founded at the end of June 2002, combines the previous shareholders of the Window-Recycling Initiative (Fester-Recycling-Initiative – FREI) and of VEKA AG. A nationwide collection system for waste windows is operated with the recycling partners Tönsmeier Kunststoffe and VEKA Umwelttechnik GmbH. Old PVC windows (shutters and doors) are treated for the manufacture of new window profiles in the recycling plants in Hörselberg-Hainich (district Behringen) and Höxter.
